# ERSTE STOCK TECHNO

Global technology equity fund

## Investment Policy

The ERSTE STOCK TECHNO mainly invests in companies from developed technology markets. The fund's investment process is based on fundamental business analysis. The majority of companies in this area can be found in the United States. As a result, Pacific and European equities tend to play a subordinated role in the fund. When selecting stocks, the focus is on high-quality, high-growth companies. A hedge against foreign currency risks is generally not provided, but is possible. Ecological and social factors as well as corporate management factors are integrated into the investment process.

Please note that investing in securities also involves risks besides the opportunities described.

The fund employs an active investment policy and is not oriented towards a benchmark. The assets are selected on a discretionary basis and the scope of discretion of the management company is not limited.

For further information on the sustainable focus of ERSTE STOCK TECHNO as well as on the disclosures in accordance with the Disclosure Regulation (Regulation (EU) 2019/2088) and the Taxonomy Regulation (Regulation (EU) 2020/852), please refer to the current Prospectus, section 12 and the Annex "Sustainability Principles". In deciding to invest in ERSTE STOCK TECHNO, consideration should be given to any characteristics or objectives of the ERSTE STOCK TECHNO as described in the Fund Documents.
